

# **Android Interface Firebird API**

## **Software Setup**

Please visit the spoken tutorial (available on github repo\*) for detailed instructions

\*GitHub repo: [https://github.com/pararthshah/android\\_interface\\_firebird\\_api\\_group2\\_cs308\\_2012](https://github.com/pararthshah/android_interface_firebird_api_group2_cs308_2012)

## **Installation Instructions**

### **Software required**

- + AVR Studio (<http://developer.android.com/sdk/index.html>)
- + Android 2.3.3 SDK (API 10)
- + Eclipse IDE with ADT Plugin (<http://www.eclipse.org/downloads/>)

### **Instructions**

Install the required software mentioned above. Download the zip file from GitHub or clone the project. You should be able to import projects into Eclipse IDE and compile them.

First import the Firebird API, then import the sample apps. Now connect the Android device via USB, and run the sample app on your device.
